

# STICKPRETTY

STUCK ON STYLE

Give your ceramic & glass tiles a new look  
in just minutes!

StickPretty created our tile decal collection to add new life to old, plain, discolored or ugly tile surfaces. By simply applying the StickPretty decal to your kitchen or bathroom tiles, you get a great new look and makeover in just minutes at a fraction of the cost of a new tile installation. Cover old, discolored, or cracked tiles, cover your entire tile surface for a new look, or just add random decals throughout your tiled area for a splash of color or design. Easily removable, our decals can be changed\* for a new look or a special occasion.

## Installation & Care Instructions

1. Thoroughly clean your tile area using any standard household glass or surface cleaner.
2. Allow cleaned tile area to dry thoroughly.
3. Common in newer construction or new tile installation is grout residue. Clean any grout residue from the edges of tiles.
4. Lightly spray or dab water on the tile to receive the StickPretty decal.
5. Peel away the StickPretty decal from the protective backing.
6. Align the top edge of the StickPretty decal with the top edge of the ceramic or glass tile where the decal is to be applied.
7. Using your finger, seal the top edge of the decal to the tile by rubbing from left to right while holding the bottom of the decal away from the surface of the tile. If the decal is misaligned, gently lift the decal from the tile and reposition. While the tile is still wet, the decal can be easily repositioned.
8. Using an applicator (credit card or small squeegee) gently & evenly apply pressure in a downward motion

bottom to apply the decal to the tile while "squeegeeing" air bubbles.

9. Work out any small bubbles with your chosen applicator tool.
10. Allow 24 hours for the adhesive & water combination to dry when burnish the edges by pressing down with your finger and running your finger around the perimeter of each tile as needed.

StickPretty decals are not meant to be used near open flame. While StickPretty decals can withstand wet environments, they are not suitable for tiles or surfaces that are submerged in water (bathroom floors/tubs).

**Care:** Clean StickPretty decals by lightly wiping with water or light soap & water.

**Removal:** StickPretty decals are designed to adhere to your tiles for years. However, removal is quick and clean with little or no residue. Simply pull downward from one corner until the tile is removed. Remove any remaining residue with household cleaner.

*\*StickPretty decals are easily removable but are NOT reusable.*
